**BQE Software Launches BillQuick CE**

LOMITA, CALIFORNIA – March 5, 2002 – BQE Software, Inc., a leading developer of time billing and project management software, announces the launch of BillQuick CE, a new product for the mobile professional that will allow users to take advantage of BillQuick’s unique time entry features from their PDA, running Windows CE. During data sync, the CE application establishes a connection with your BillQuick data file to automatically exchange time entry, project, activity and employee information.

“BillQuick’s open architecture makes add-on products and modules possible, so we can enhance our features to meet each customer’s individual needs,” said Will Breiholz, General Manager of BQE Software. “Implementing BillQuick CE gives the traveling professional an opportunity to experience the benefits of using our software anywhere at anytime. By allowing them to fill out their time cards and other information in their PDA and then sync with the database on their file server at the office, productivity and efficiency increases for even the busiest professional.”

The time card module enables users to enter their time directly into the system, and security options are available to limit employee access to sensitive information. Users can either manually enter time, using only a few key strokes, or time can be auto-logged using the built-in timer function, which works even when the PDA is off. This powerful feature provides accurate time-tracking using a stop watch on your PDA.

BillQuick CE works with any Windows CE 3.0, Pocket PC 2000 or higher operating system using Strong Arm, MIPS or SH3 chip (includes iPAQ, HP and Casio). BQE Software offers a free 60-day evaluation copy that can be downloaded from their Web site. For more information on BQE Software or BillQuick products, call (888) 245-5669 or visit [www.BillQuick.com](http://www.BillQuick.com).

**About BQE Software, Inc.**

BQE Software, Inc., founded in 1995, is a leading developer of time billing and project management software. Its flagship product, BillQuick, offers tools to maintain time records, client information and project development. BillQuick meets the needs of users who require billing based upon criteria such as time and expense, fixed fee, hourly billing, hourly billing with a “not to exceed” amount and contractual billing. All invoices, statements and reports are completely customizable with Seagate’s Crystal Reports 7.0. BillQuick is network compatible with multiple users, and allows for off-site time entry and data merging. It features Microsoft Access compatible data files as well as SQL server data files. In addition, billings and reports can be exported to any software package, including QuickBooks and Peachtree Accounting. Architects, engineers, accountants, attorneys, consultants and programmers have all discovered the unequaled features and flexibility of BillQuick products. For more information on BQE Software or BillQuick products, call (888) 245-5669 or visit [www.BillQuick.com](http://www.BillQuick.com).
