### **BQE Software Introduces MySpy 2.0** *Powerful Tracking/Auditing Device Designed for Businesses, Employees & Consumers*

LOMITA, CALIFORNIA – June 27, 2002 – BQE Software, Inc., a leading developer of time billing and project management software, announces the launch of MySpy 2.0, a powerful monitoring tool designed for business managers, employees and consumers. MySpy 2.0 enables employers, employees and parents/guardians to audit computer use through activity tracking.

MySpy 2.0 can either be visible to the user as an icon in the system tray or it can be completely blind or hidden. It monitors which programs are open and which files within each program are active. MySpy 2.0 is the perfect tool to track Web-browsing activity, email usage and any other application. Idle time can also be tracked. The activity details are stored in a MS Access® compatible database and automatically delivered as a HTML report via email.

For businesses, MySpy 2.0 can guard against inappropriate computer use at the office. In addition, MIS groups or other IT decision-makers can collect data to gain an overall understanding of the corporation's software usage. For example, the MIS department will learn which programs need to be upgraded or which applications require training.

For employees who bill for their time, MySpy 2.0 becomes their reliable assistant, helping to confirm how much time is spent on an application or a specific project. The software can also send idle time reminders at the users request and frequency. MySpy 2.0 has a small memory footprint (the amount of memory the product needs to run), using less than 2 percent of the system's resources to operate. Look for MySpy 2.0 to integrate with BillQuick in Fall 2002, enabling employees to automatically complete their time cards as well.

“MySpy 2.0 is an exciting release because it is our first product that is also geared towards consumers,” said Will Breiholz of BQE Software. “Parents and guardians can use MySpy 2.0 to monitor a child’s computer use - whether it be to make sure school assignments are being worked on or to safeguard them from inappropriate Web-browsing.”

BQE Software has designed a series of products for professional service industries that completely automate the time keeping and billing process. This includes software for off-site consultants and satellite offices, time keeping, expense recording, report generation, invoicing, client setup/review and project setup/review via the Web, email and PDAs.

BQE Software also offers a free 60-day evaluation copy of MySpy, BillQuick and all of its add-on products that can be downloaded from their Web site. For more information on BQE Software or MySpy 2.0, call (888) 245-5669 or visit [www.BillQuick.com](http://www.BillQuick.com).

#### **About BQE Software, Inc.**

BQE Software, Inc., founded in 1995, is a leading developer of time billing and project management software. Its flagship product, BillQuick, offers tools to maintain time records, client information and project development. BillQuick meets the needs of users who require billing based upon criteria such as time and expense, fixed fee, hourly billing, hourly billing with a “not to exceed” amount and contractual billing. All invoices, statements and reports are completely customizable with Crystal Decision’s Crystal Reports software. BillQuick is network compatible with multiple users, and allows for off-site time entry and data merging. It features Microsoft Access compatible data files as well as SQL server data files. In addition, billings and reports can be exported to any software package, including *QuickBooks* and *Peachtree Accounting*. Architects, engineers, accountants, attorneys, consultants and programmers have all discovered the unequalled features and flexibility of BillQuick products. For more information on BQE Software or BillQuick products, call (888) 245-5669 or visit [www.BillQuick.com](http://www.BillQuick.com).
