# INTRODUCTION

*Welcome to ArchiOffice® Invoice Book!*

An invoice is not only an important financial document, but it is also a marketing piece of communication that nurtures client relationships. Hence, it must communicate positive images to both new and long-term clients: Quality, Capability, Professionalism, and Confidence. ArchiOffice comes with two standard invoice templates (Type A and Type B) designed with Crystal Reports. However, it provides various display options for an invoice that result in different layouts of these two invoice templates to suit your preference.

ArchiOffice allows you to change the invoice layout at the project and global level. You can customize the invoice layout and set invoice display attributes per project or for all the projects. Invoices are typically created based on different billing methods. The desired invoice options can be selected and the invoice be viewed as a draft and then finalized. Invoices can be generated in different output formats.

You can set or change the following options for your invoices, according to your preference and requirements:

## Preferences > Billing Level

- Invoice Number
- Invoice Template: Type A or Type B
- Invoice Output: Viewer, PDF or RTF document

## Projects > Billing Level

- Invoice Method: Hourly, Stipulated Sum, Percentage of Construction, etc.
- Invoice Extras: Sum Totals or Matrix, Statement, and other items such as markups, interest, taxes (when applicable), retainer, fee, etc.
- Invoice Format: Summarize or Itemize by Code, Phase, Employee, Role, etc.; show Rate, Quantity and Hours, etc.; and Balance Due for project or invoice.
- Invoice Output: Custom Title and Message, Template A or B, Output as Viewer, PDF or RTF document

If neither of the default invoice template meets your needs, you can have custom invoice template created by us. Please contact our Custom Reports Team at [customreports@bqe.com](mailto:customreports@bqe.com) for details.

Please send any comments or suggestions to [AO-Ideas@bqe.com](mailto:AO-Ideas@bqe.com). For other information, contact us at 310-602-4010 or [sales@bqe.com](mailto:sales@bqe.com).

## Templates

Type A Invoice

This is a typical Type A invoice layout displaying basic and additional services summarized by employee along with itemized expenses. You can choose to display the applicable taxes as well as retainer balance, if any.

**Type A Invoice**

This is a typical Type A invoice layout displaying basic and additional services summarized by employee along with itemized expenses. You can choose to display the applicable taxes as well as retainer balance, if any.

**Stipulated Sum Invoice**

This is a Type B invoice based on the Stipulated Sum billing method. It displays the budgeted fee along with the current invoice amount and percentage of completion per phase. The calculations involved are:

$$\text{Actual \% phase completed} = \frac{\text{Charge amount (time entry) of phase} \times 100}{\text{Budgeted fee of phase}}$$

$$\% \text{ Complete of Current Invoice} = \frac{\text{Current Invoice amount}}{\text{Amount Remaining}} \times \% \text{ phase completed}$$

**Retainer Balance** **\$1,000.00**

Please make payments to Fountainhead A+E, Inc. Late payments are subject to penalty fees.

**Multiple of DSE/DPE Invoice**

This is a Type B invoice based on the Multiple of DSE/DPE billing method. It displays the basic and additional services summarized by employee along with itemized expenses. You can choose to show the applicable taxes, retainers and invoice total.

## Calculations for DSE/DPE

**Case 1:** If no Cap amount is given, then ArchiOffice fetches the DSE/DPE Salary rate from Preferences > Users > Time/Expense and multiplies it by the Rate (multiplier) defined on Projects > Billing > Options screen.

$$\text{DSE/DPE Salary} \times \text{Rate} \times \text{Hours} = \text{Invoice Amount}$$

**Case 2:** If the Cap amount is given, then ArchiOffice fetches the DSE/DPE salary rate from Preferences > Users > Time/Expense and multiplies it by the Rate (multiplier) defined on Projects > Billing > Options screen. If the Cap Amount defined on the Options tab is higher than the calculated invoice amount, billing will proceed as normal.

$$\text{DSE/DPE Salary} \times \text{Rate} \times \text{Hours} = \text{Invoice Amount}$$

**Case 3:** If the Cap amount is given, then ArchiOffice fetches the DSE/DPE salary rate from Preferences > Users > Time/Expense and multiplies it by the Rate (multiplier) defined on Projects > Billing > Options screen. If the Cap Amount defined on the Options tab is lower than the calculated invoice amount, the lower amount will be billed.

$$\text{Cap Amount} / \text{Hours} = \text{Rate}$$

**Note:** If the Rate is zero on the Options tab, then ArchiOffice gives priority to the time entry rate.

**Percent of Construction Invoice**

This is a Type B invoice based on the Percent of Construction billing method, where the total fee amount is calculated as a percentage of the construction cost. It displays the budgeted fee along with the current invoice amount, percentage of completion per phase and hourly basic services. The calculations involved are:

$$\text{Total Fee Amount} = \text{Construction Cost} \times \text{Fee Percentage} / 100$$

$$\text{Amount Remaining} \times \% \text{ Complete of Current Invoice} = \text{Current Invoice Amount}$$

$$\% \text{ Phase Completed}$$
