

Strengthening Your Business With BQE Core's Cloud Technology

Cloud software is, in the words of Forrester, a “must-have business technology” for forward-looking organizations who want to streamline their operations, improve efficiency, enhance security, and reduce costs.¹ Cloud adoption keeps increasing: Indeed, 96% of IT professionals are already using it, and 92% of SMBs have a defined cloud strategy.²

While there are innumerable benefits to using cloud platforms, these are the principal reasons to embrace the new normal and move into the future with BQE Core's cloud platform.

EASE OF USE

- Use Core on any operating system and browser, and work on the go with its comprehensive mobile apps for iOS and Android
- Stay agile with Core's centralized real-time data, scalable platform, and straightforward permissions
- Take advantage of a steady stream of new features thanks to Core's cloud infrastructure—and never pause for updates

SECURITY

- Instead of worrying about managing your own security, leave it to BQE's experts and our enterprise-grade servers with 24/7 surveillance and regular security audits
- Make data loss a thing of the past with continuous backups stored in multiple secure locations
- Rest easy knowing that BQE uses the most up-to-date data encryption methods along with multiple layers of security controls

REDUCED COST

- Core is managed for you and requires minimal intervention, so you can dramatically lower your support and maintenance costs
- Don't waste your valuable time on updates or installations—just log in to Core and keep growing your profits
- Because Core uses minimal computing power and is available on any device and, there's no longer a need for expensive servers and other hardware
