

Web Suite V19 Enhancements

- 1. Brand New Engine:** Web Suite V19 uses the latest and greatest version of the Dot Net framework, version 4.6.2. This underlying engine upgrade provides a performance boost and tighter security by incorporating TLS 1.2 as a default secure protocol.
- 2. Void Checks Linked to Vendor Bills:** In Web Suite V19 you can void checks, including the ones that are linked to vendor bills or reimbursable employee expenses.
- 3. Payment Term “Due Upon Receipt”:** If you require your clients to pay your invoices upon receipt, we have added a new payment term that can be set as the default for your clients and projects. With this modification, you’ll see a major improvement in your cash flow.
- 4. Create Time Entry for Approved PTO Requests:** Once you approve an employee’s paid time off (PTO) request, a time entry can be automatically added for them.
- 5. Global Account Assignment for Invoices Without Items:** Web Suite V19 uses the default income account specified in Global Settings for Manual Invoices that are not associated with an Activity Code or Expense Code. This helps in posting the income to your desired account instead of the hardcoded account.
- 6. General Journal Column Sorting:** Web Suite V19 now allows you to sort the General Journal details, making it easy to locate line items for those multi-line journal entries.
- 7. Work-in-Progress by Client Widget:** A brand new widget in Web Suite V19 called Work-In-Progress by Client displays the value of unbilled time and expense per client. This is an excellent tool for managers, owners, partners to keep track of their client investments.
- 8. Enhanced Phased Project Updates:** We’ve also enhanced the updates on projects with phases. If you change values such as custom fields, the same change will be automatically applied to your phases.
- 9. Upgraded Manual Invoice From and To Dates:** In Web Suite V19, if you populate a manual invoice using “Build Options”, then the date “From” and “To” for the invoice will be set in the Build Options section.
- 10. Performance Enhancements:** We worked hard to enhance the overall performance of Web Suite and minimize its memory usage. Consequently, Web Suite V19 is faster, enabling you to save time and enjoy a smoother process.

11. New Color Theme: We have added a brand new color theme option called Rio for a pleasant and fresh user experience.
