BQE Core® Business Management Platform Adds Gantt Charts to Simplify Project Management

NEW FEATURE PROVIDES AT-A-GLANCE VISIBILITY INTO PROJECTS

Torrance, CA – March 29, 2018 — [BQE Software, Inc.](#), a global market leader in project management and accounting software, today announced the addition of Gantt charts to its BQE Core cloud-based business management platform. Gantt charts will help professionals and their clients achieve greater efficiency and more profitable projects by better organizing and managing activities and resources along timelines.

The Gantt charts in BQE Core comprise a visual tool that represents the many parts of a project, allowing managers and end users to quickly understand information such as who is working on project tasks, when tasks will be accomplished, and how the tasks relate to the overall project, giving users visibility into who is available while doing project planning. With this visual representation, users can plan resources more efficiently by distributing work to the appropriate employees and improve productivity by facilitating greater communication within project teams.

“Over the past few years we have been hearing increasingly from our customers that they would like us to incorporate Gantt charts into our solutions,” said Shafat Qazi, Founder and CEO of BQE. *“BQE has always prided ourselves on being customer-centric and we’re thrilled to deliver this highly requested, visually stunning, and enormously valuable tool to our users. Core’s Gantt charts are linked to time cards, so clients can view employees’ progress in real-time. Core is the only platform out there that integrates with every other part of your company, from time and billing, to accounting, and to business intelligence.”*

Core gives users a summary of tasks with the amount of resources involved, total number of hours, percent complete, start and end dates, and duration. It eliminates double data entry

through its integration with QuickBooks Online, Xero, Dropbox, Google Drive, and MYOB AccountRight, and offers comprehensive mobile apps for Android and iOS.

ABOUT BQE®

BQE Software develops innovative practice management software for professional services firms. Its products—including BQE Core®, BQE BillQuick®, BQE ArchiOffice® and BQE EngineerOffice®—centralize and streamline the way firms enter and use information for time tracking, billing, project management, and accounting. This gives them the speed and insight necessary to rapidly make informed decisions, increase productivity, and grow profits. With more than 400,000 users worldwide, BQE Software is trusted by leading architects, engineers, accountants, attorneys, IT specialists, and business consultants. The company is headquartered in Torrance, California, with offices in Sydney, Australia.
