BQE Software Offers Free Automatic Mileage Tracking to Core Users

EXISTING BQE CORE USERS GET FREE MILEAGE TRACKING FROM THE CORE APP TO HELP THEM CAPTURE TAX-DEDUCTIBLE MILES AND POTENTIALLY SAVE MILLIONS OF DOLLARS.

Torrance, CA – Sept. 25, 2019 — BQE Software, Inc. a leader in project management and accounting software for professional services, recently announced its Core app will offer free smart mileage tracking to make it easy for users to capture the full value of their billable and reimbursable miles.

Rather than relying on manually logging miles or paying for an additional mileage tracking app, all Core users now get free, automatic mileage tracking in the Core iOS and Android app. The Core mobile app automatically records all automobile trips providing route information, mileage, travel time and costs. Core uses artificial intelligence to link the trips to the appropriate projects and convert them into an expense, which can be billed to the client.

"Most professional services firms conduct some element of their business off-site, and each of those miles driven is a tax-deductible or reimbursable expense," said Shafat Qazi, CEO & Founder of BQE Software. "When people track their miles manually, they have to remember the details of each and every drive. If they miscalculate or forget to log their miles, they could be leaving a lot of money on the table. Anyone who wanted to automate mileage tracking had to pay for a separate app to do that. Now they get smart mileage tracking for free with Core."
