BQE CORE Named GetApp's 2021 Accounting Category Leader

Scoring a near-perfect score of 99 out of 100, BQE CORE received top marks in ease of use, value, likelihood to recommend, support, and functionality.

TORRANCE, Calif. (March 18, 2021) - BQE CORE, a leading business management software platform designed specifically for professional service firms, was recently named the **Accounting Category Leader for 2021** by GetApp, a premier online resource for businesses considering software as a service (SaaS) products.

Each year, GetApp ranks the top business apps based on five different categories:

1. Ease of use
2. Value
3. Likelihood to recommend
4. Customer Support
5. Functionality

The BQE CORE platform received a near-perfect score of 99 out of 100 across all categories.

As noted by a GetApp reviewer, streamlining the accounting process is the primary focus of the software. CORE's powerful design helps firms bolster their cash flow through several channels: expediting billing, simplifying project management, increasing billable hours, and more.

Regarding BQE CORE, the reviewer said, "Since implementing CORE, we have found that we have much better control over how our projects are managed, are seeing much better performance data and are very happy with the product."

"We are thrilled to have been named GetApp's Accounting Category Leader," stated Bill Arnold, BQE's Chief Growth Officer. "This recognition is a humble testament to how we constantly strive to improve our software and provide our customers with an effortless way to manage their business."

The GetApp reviewing process is straightforward: platforms with at least 20 unique reviews that meet other basic functionality requirements are scored in performance based on the five categories listed above. Each category is worth 20 points, for a total of 100 points. BQE CORE's 99 point total, benchmarked best score in each of the five categories.

BQE CORE is designed specifically to make it easier and more profitable to run a business. The platform automates repetitive tasks, streamlines accounting and billing and provides business intelligence to every segment of a professional service firm. The ultimate objective is to enable busy professionals to focus more of their time on serving their clients rather than managing internal processes.
