CORE

Why Choose Core HR?

How much time do you spend answering the same questions from employees? How many hours do you spend filing PTO requests? Or using spreadsheets to calculate how much time an employee has left vacation? Forgetting when employee reviews are due or digging through last year's paperwork to see salary history? Most people get into HR to make a difference but many get stuck in administration instead. Core HR gives you back time to focus on people.

REDUCE ADMIN TASK OVERLOAD

HR can turn their attention to engaging and developing people. Rigid, legacy HR systems and manual processes will no longer prevent HR from cultivating relationships. And HR's desired focus will come to life: making a difference in the lives of their employees. With Core HR, you can do everything from tracking time off to performance reviews painlessly.

ENHANCE EMPLOYER PROTECTION

Employers are still wary of compliance but many HR leaders say the only way to reduce that anxiety is to take a proactive approach to compliance management. Protect yourself with the right documentation. With Core HR, you can store all employee forms in one convenient digital location, making your onboarding and termination consistent.

IMPROVE EMPLOYEE RETENTION

Employees don't stick with a single company from hire to retire. Job hopping is the new norm. If employees don't get frequent opportunities to learn and grow, or get timely feedback, chances are they'll hop sooner rather than later. Core HR will help you schedule and execute performance reviews so you never miss an opportunity to provide feedback.

BOOST PRODUCTIVITY WITH BETTER TALENT

HR departments are still held hostage by rigid legacy systems, but don't expect that to last. In the next few years, look for HR teams in the SMB world to use technology to do two things: automate routine & repetitive tasks, and give back time to grow the company's greatest asset: their people. 90% of Core HR users said Core HR significantly freed up time to tend to business needs.
