

Gantt Charts in BQE Core

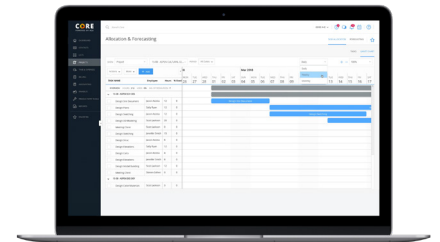

BQE Core's interactive Gantt charts are a visual representation of activities and resources along a timeline, enabling you to understand and manage employees' responsibilities. With these impressive tools, you can balance tasks, time, and team members, so you can maximize your resources and boost your project profitability. Plus, because Core is a comprehensive project accounting platform, you'll monitor progress and performance in real-time.

FEATURES

- See allocated tasks for project phases, vendors, employees, or groups of employees
- Drag and stretch tasks to modify them and easily set dependencies between them
- View summary information like total hours assigned, percentage used and complete, start and end dates, and duration
- Zoom in and out to change your timeframe
- Send notifications to alert employees when specific tasks are completed

BENEFITS

- Manage all the moving parts of your projects in one centralized location
- Enjoy visibility into both the big picture and project details with extensive visual representations for easy clarity
- View progress at a glance in real-time, thanks to the data flowing from and to Core's other modules
- Stay agile by quickly reacting to changes in your schedule and resources with an intuitive interface
